SUMMARY

Backend engineer who builds and operates automation-heavy systems in production. I own a fleet of Playwright robots that integrate with major Brazilian health insurers' portals, designed the reusable architecture behind them, and keep them reliable with observability on AWS. Recognized as the company-wide standout employee at Saúde Bliss (Oct 2026). Lived and studied in Orlando, FL (2017–2019); advanced English, comfortable working with US teams, with strong overlap with US Eastern business hours.

EXPERIENCE

Software Engineer — Saúde Bliss | Mar 2025 – Present

Insurtech platform (Series A) automating the back-office of health insurance brokers · São Paulo, Brazil · Hybrid

- Own and maintain a fleet of 5–6 production Playwright robots (TypeScript/Node.js) that automate insurance quoting across major Brazilian health insurers' portals.
- Rebuilt a quoting robot's automation flow, cutting average runtime from ~7 to ~3 minutes and lowering its monthly error rate from ~35% to ~8%, validated across 70 test scenarios before rollout.
- Designed a reusable robot architecture with shared libraries and standardized project templates (Golden Path), so new insurer integrations start from a consistent base.
- Added observability (structured logs, traces, CloudWatch metrics) and continuously harden the robots as third-party portals change, so failures are detected and fixed faster.
- Operate services on AWS (EC2, S3, CloudWatch), configure IAM policies, and write MySQL queries to support backend operations.
- Partner with senior engineers on architecture and design decisions.
- Received the company-wide Standout Employee recognition at the all-hands for delivering the quoting robot improvements under a tight deadline.

Data Analyst Intern — SESI São Paulo | Jan 2025 – Mar 2025

- Built SQL and Python ETL pipelines that improved data consistency and reporting reliability.
- Automated recurring data workflows to reduce manual effort.
- Delivered Power BI dashboards and translated business requirements into data models.

IT Support & Infrastructure Analyst — Preçolândia | Sep 2023 – Aug 2024

- Supported ERP systems, networks and end-user infrastructure in a high-volume retail environment.
- Automated routine tasks and data organization to improve internal reporting efficiency.
- Gathered requirements from business users and turned them into technical adjustments.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Backend: Node.js, Express, FastAPI, Flask, REST APIs
Automation: Playwright, web scraping, browser automation / RPA
Cloud & DevOps: AWS (EC2, S3, CloudWatch, IAM), Docker, Git/GitHub
Data: MySQL, MongoDB, Pandas, ETL, Power BI
Observability: Structured logging, tracing, CloudWatch metrics
Spoken languages: English (advanced), Portuguese (native)

EDUCATION & CERTIFICATIONS

Associate's, Systems Analysis & Development — São Judas Tadeu University | Dec 2026 (expected)

- Google IT Automation with Python Professional Certificate — Google (2026)
- CS50's Introduction to Artificial Intelligence with Python — HarvardX (2024)
- Advanced JavaScript and TypeScript — Udemy (2025)
